PATIENT NAME:

Ac# NO.:

SEX:

DATE OF BIRTH:

UNIT:

Following careful evaluation of your child's condition, it is recommended that treatment include medication therapy. Specifically, _____ / _____.
Medication Estimated Daily Dosage Range (Mg/day)

This medication is intended to treat your child's symptoms of _____

As with all medications, there are individual variations in response and the possibility of side effects. Most side effects do not interfere with daily functioning and, may even, go away during treatment as you child's body adjusts to the medication. Possible common and rare side effects are explained in the Parent Information Sheet on _____ (Specific Medication/Class of Medication) which you have been given.

Continuous observation and monitoring by staff will ensure your child's positive response to medication therapy. If your child experiences a negative response or side effect, his/her physician will evaluate the need to change the dosage, to discontinue the medication, to change to another medication in the same class of medications or add another medication specifically to counteract the side effects. You will be informed of any changes as well as your child's response to the medication. If at any time, you have questions pertaining to the medication, please contact your child's physician:

Dr. _____, at () _____ - _____ x _____

I have read and understand this consent for medication as well as the Parent Information Sheet I was given. I give permission for the prescribed medication/class of medication and understand that I may withdraw my permission for the medication at any time in writing.

Signature of Parent/Legal Guardian _____ Date

Signature of Psychiatrist _____ Date

Effects and side effects have been explained to parent/legal guardian and patient, and a copy of the Parent Information Sheet on _____ was given to parent/legal guardian.
